

Wafer Butterfly Valves

Schumacher Irrigation wafer butterfly valves are an economical alternative to gate, ball or in-line valves. The simple design offers minimal maintenance and long lasting life. The valves are available in either lever handle (sizes 2"-12") or gear wheel operators (sizes 2"-36"). The lever handle include an indicator plate while the gear wheel include a dial, both indicating the fully open, partially open, or closed settings.

Advantages:

- Stainless steel stem
- Perfect water shutoff in both directions
- Self-centering disc
- Compact, light weight design
- Anti blow out stem
- Fusion bonded epoxy coated body
- Easy installation
- Minimal flow loss
- Reliable flow control
- Flange gaskets are not needed and should not be used
- Easy to use lever handle or gear wheel
- Extensions available in: 24", 36", 48" and 72" lengths
- 200psi 2"-12", 150psi 14"-16"

Construction:

Body:Cast Iron
 Stem:Stainless Steel
 Disc:Ductile Iron or Stainless Steel
 Seat:Buna-N
 O-Ring:Buna-N
 Bushing:PFTE
 Retainer Plate:Mild Steel
 Handle:Malleable Iron
