Irrigation & Liquid Handling Solutions

Wafer Butterfly Valves

Schumacher Irrigation wafer butterfly valves are an economical alternative to gate, ball or in-line valves. The simple design offers minimal maintenance and long lasting life. The valves are available in either lever handle (sizes 2"-12") or gear wheel operators (sizes 2"-24"). The lever handle include an indicator plate while the gear wheel include a dial, both indicating the fully open, partially open, or closed settings.

Advantages:

- Stainless steel disc and stem
- Perfect water shutoff in both directions
- Self-centering disc
- Compact, light weight design
- Anti blow out stem
- Easy replaceable seat
- Epoxy coated cast iron body
- Easy installation
- Minimal flow loss
- Reliable flow control
- Flange gaskets are not needed and should not be used
- Easy to use lever handle or gear wheel
- Grease Zirk for easy lubrication
- Extensions available in: 24", 36", 48" and 72" lengths

Construction:

- Body:Cast Iron
- Stem:Stainless Steel
- Disc:Stainless Steel
- Seat:EPDM
- Packing:NBR
- Bushing:Delrin
- Retainer Plate:.....Mild Steel
- Plug:Mild Steel
