

Aluminum Telescopes

The Schumacher aluminum telescopes are designed to bridge the gap between two stationary items. These durable lightweight telescopic pipes will eliminate the guesswork when measuring for a pipe. The units are available in 6", 8" & 10" diameters and 2' to 4', 5' to 10', and 10' to 20' in length. The 2' to 4' & 5' to 10' are able to ship via ground carriers.

The telescopes are ideal for center pivot hook ups (stationary or mobile). Standard units are coupled together with male by female ring lock connections.

Advantages:

- No measuring
- Adjustable to compensate for length and height variations
- Light weight and durable
- Designed for low or high pressure
- Portable
- Easy to connect

Coupling Options:

- Ringlock (standard)
- Band and Hook
- Ball and Socket
- Twist-lock
- Flanged
- Custom combinations available

Length Options:

- 2' to 4'
- 5' to 10'
- 10' to 20'
- Custom lengths available

DESCRIPTION	PART #	WEIGHT	COLLAPSED LENGTH RING TO RING	EXTENDED LENGTH RING TO RING
6" x 2-4'	6-1220	15.5	31"	49"
6" x 5-10'	6-1221	26.5	67"	115"
6" x 10-20'	6-1222	44.7	127"	229"
8" x 2-4'	6-1223	20.5	31"	49"
8" x 5-10'	6-1224	33.7	67"	115"
8" x 10-20'	6-1225	55.6	127"	229"
10" x 2-4'	6-1226	21.7	33"	51"
10" x 5-10'	6-1227	37.1	69"	117"
10" x 10-20'	6-1228	62.7	129"	229"

* Double Chain Telescopes available for high pressure situations, or when the telescope is fully extended.
