## **VOLUME GUN STANDS**

The Schumacher aluminum volume gun stands are rigid for high strength. They are designed so the base fills with water for weight and stability. The aluminum gun stands are so lightweight that when empty, one man can easily handle them for loading and unloading.

They are ideal for small acreages, pastures, pivot corners, lagoon waste pump outs or hard to reach areas.

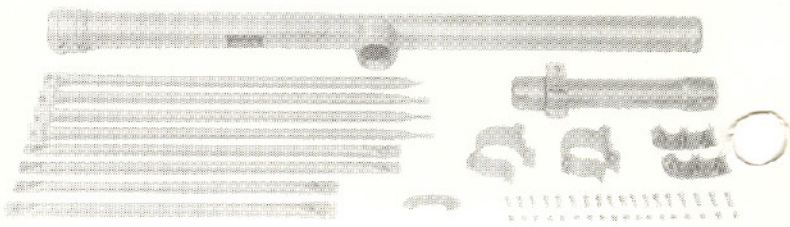

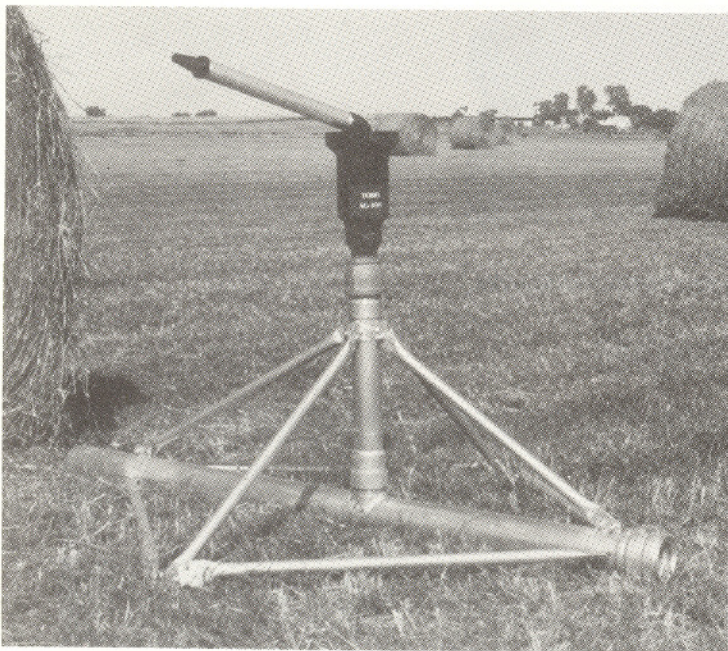

The stands can be used with several others on the same line. They can be connected by ring lock or band & hook. The threaded riser top can be sized to fit any volume sprinkler gun.

**Model A**, The collapsible fold down volume gun stand is especially made to bring shipping costs down for efficient shipment. The 4" mainline by 3" riser stand is very lightweight and easy to assemble (by the color coordinated dots). It weighs approximately 40 lbs. or 18.14 kilograms.

**Model B (standard type)**, This volume gun stand comes as one unit and weighs approximately 48 lbs. or 23 kilograms. This stand shown has a 6" ring lock mainline and a 4" riser.

Schumacher Irrigation also manufactures special gun stands to meet the irrigator's needs. For example the height of the riser can be designed for high clearance row crops or for low growing vegetation.
